

- What is hot and what is not. TPA-RRG captures the inevitable movement of stocks into and out of favor.
- Scores and ranking

Clients can quickly see which stocks are showing the best and worst relative

strength characteristics. TPA found that using RRG's was very beneficial, but took some time to parse through, so we simplified the process by creating a score for each stock and sector.

The best of both worlds – RRG & TPA
Now, clients can use <u>TPA-RRG scores and rankings</u> to identify stocks that are not only moving into favor, but are also technically positive.

• TPA-RRG analyzes every stock in the Russell 1000 and 25 major sector & subsector ETFs

Any Sustained Market Downturn Should Mean Significant FANG Underperformance

TPA and other strategists have written about the narrowing of the market. TPA has focused on the outperformance of XLK versus the S&P500, but this report will focus on FANG stocks. The first chart below shows the relative performance of XLK and the S&P500 over the past 4 years. It shows that the performance gap began about 18 months ago at the start of 2023. Chart 2 shows that XLK has outperformed the S&P500 by 46% net in the past 18 months (88.97% - 42.93%), which is more than twice the performance of the benchmark.

Relative performance of XLK and S&P500 – 4 years

Relative performance of XLK and S&P500 – 18 months

XLK is comprised of mostly MSFT and NVDA, so another TECH index may be more helpful for our analysis. NYSE FANG includes GOOGL, AVGO, TSLA, AMZN, MSFT, AAPL, NFLX, SNOW, NVDA, and META.

If we compare NYSE FANG and XLK, we see that in the past year, FANG has pulled ahead. The second chart below shows that FANG has outperformed XLK by 86.52% net (175.49% - 88.97%) in the past 18 months. FANG's performance was 97% greater than XLK in the past 18 months.

Relative performance of NYSE FANG and XLK – 4 years

Relative performance of NYSE FANG and XLK – 18 months

Finally, let's look at FANG compared to the market benchmark S&P500 in the past 18 months. *FANG's performance in the past 1 ½ years is more than 4 times greater than the S&P500 (175.49% versus 42.93%). This is a historical aberration.*

Relative performance of NYSE FANG and S&P500 – 18 months

So, what does all this mean? Does it make the market more vulnerable? Does it mean that there are probably undiscovered gems away from FANG and XLK? The answer to both of these questions is probably "yes", but there is a more important question for investors. In a downturn, what will happen to FANG stocks versus the S&P500?

One can assume that FANG's huge outperformance in the past 18 months means that many portfolios are full of or overweighted to a large extent with FANG stocks. In a downturn, this will mean that investors will be forced to sell more FANG stocks than other stocks. That will mean that FANG's huge outperformance in the past 18 months will most likely turn into a large underperformance in a downturn.

Turning Point Analytics Disclaimer

Turning Point Analytics (TPA) is only one of many tools that an investor should use to make a final investment decision. TPA is an overlay on top of a client's good fundamental or macro analysis. TPA does not create or provide fundamental analysis. The information in this communication may include technical analysis. Technical analysis is a discipline that studies the past trading history of a security while trying to forecast future price action. Technical analysis does not consider the underlying fundamentals of the security in question and it does not provide information reasonably sufficient upon which to base an investment decision. Investors should not rely on technical analysis alone while making an investment decision. Before making an investment decision, investors should consider reviewing all publicly available information regarding the security in question, including, but not limited to, the underlying fundamentals of the security and other information which is available in filings with the Securities and Exchange Commission. The information and analysis contained in reports provided by TPA are copyrighted and may not be duplicated or redistributed for any reason without the express written consent of TPA. The information in this communication is for institutional or sophisticated investors only. By accepting this communication, the recipient agrees not to forward, and/or copy the information to any other person, except as permitted, or required by law. TPA does not guarantee accuracy or completeness. TPA is a publisher of technical research and has no investment banking or advisory relationship with any company mentioned in any report. Reports are neither a solicitation to buy nor an offer to sell securities. Past performance is in no way indicative of future results. Opinions expressed are subject to change without notice. TPA will provide, upon request, the details of any past recommendations. TPA's analysis and recommendations should not be used as the sole reason to buy or sell any security. TPA may compensate brokers and intermediaries for sales and marketing services. You understand and acknowledge that there is a very high degree of risk involved in trading securities and/or currencies. The Company, the authors, the publisher, and all affiliates of Company assume no responsibility or liability for your trading and investment results. It should not be assumed that the methods, techniques, or indicators presented will be profitable or that they will not result in losses. Statements, data, and analysis made by TPA or in its publications, are made as of the date stated and are subject to change without notice. TPA and/or its officers and employees may, from time to time acquire, hold, or sell a position in the securities mentioned herein. Upon request, TPA will furnish specific information in this regard. TPA will not be held liable for losses caused by conditions and/or events that

are beyond TPA's control, including, but not limited to, war, strikes, natural disasters, new government restrictions, market fluctuations, and communications disruptions.
